Beschreibung

Very complex upload box enables you to upload images both

from WWW addresses and computer. It is also possible to assign photos to albums. A slideshow

and gallery for smartphones is also automatically generated. It is worth to mention the possibility

to set account on the website by the users.

Then they have a quick access to their own albums and

pictures. One of the revolutionary solutions is the module of external servers. Thanks to this one can

effectively manage the available transfer.

Thanks to the multi-languages module you can host your

image hosting site in every country, In order to add a new language, it is enough to edit one k. The

system of tags and inbuilt browser makes it possible for the users to easily find the pictures they are

interested in.
