Description

Groupon Clone Enterprise is a PHP application that allows you to run a business similar to Groupon.com, CityDeal and DailyDeal. The business concept is simple YET powerful. Each day Groupon offers users a single fantastic deal for a variety of cities. It could be deep discounts on food, entertainment, places to stay or things to buy. There is a minimum number of deals that have to be sold before everyone can get it. Features include: Mobile plugin, Facebook integration, Social Sharing, Multi-Template, Paypal integration, Email subscription, full admin backend and many more!
