Description

FPDF is a PHP class which allows to generate PDF files with straight PHP, that is to say without using the PDFlib library. The advantage is that the latter requires a fee for a commercial usage. F from FPDF stands for Free: you may use it for any kind of usage and modify it to your needs.

FPDF has other advantages: high level functions. Here is a list of its main features:

- Choice of measure unit, page format and margins
- Page header and footer management
- Automatic page break
- Automatic line break and text justification
- Image support (JPEG and PNG)
- Colors
- Links
- TrueType, Type1 and encoding support
- Page compression
