Description

The solution for building website administration tools - For a developer or project manager building mid-sized web projects, that needs to create a website administration tool and to manage database content, NeXTensio is the solution that brings productivity to the process. Unlike other software packages, our product uses a tight integration with the database and automates form generation and editing, allowing the creation of a CMS solution in 15 minutes. NeXTensio features:

- Productivity, even for non-programmers;
- Ease of use;
- Tight database integration;
- Automate form creation and editing;
- Visual content editing using KHTML;
- Multiple programming languages support;
- Tight integration with Macromedia Dreamweaver MX;
- Multiple database type connection;
- MAC full compatibility.
