Description

PHPService is a template engine, comparable to Smarty . PHPService provides an easy-to-use XML-based Tag language for creating your templates.

This template engine supports

Reading Variables

A simple control structure : IF/THEN/ELSE

Variable transformation (upper,lower,str_replace)

Including subtemplates

multi-language-driven websites

caching

Beside this PHPService comes with a documented API supporting session-handling, application variables and a database abstraction layer.
